1. Claims 1-17 are presented for examination.
2. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-10, and 16-17 drawn to a multimodal browser capable of handling voice markup pages, classified in class 709, subclasses 203-204 and 227.
 - II. Claims 11-15, drawn to a user communication device with a short-range communication subsystem and a peripheral functionality of the device, classified in class 375, subclasses 244 and 324 as well as class 379, subclass 88.17.
3. The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as it is usable by any multimodal browser system capable of handling voice markup pages, classified in class 709, subclasses 203-204 and 227 and which lacked the features of the user communication device with a short-range communication subsystem and a peripheral functionality of the device, classified in class 375, subclasses 244 and 324 as well as class 379, subclass 88.17. See MPEP § 806.05(d).
4. Because these inventions are distinct for the reasons given above and because the search required for each group is different and not co-extensive for examination purpose because these groups would require different searches on PTO's classification class and subclass e.g.

- a) the Group I search (1-10, and 16-17) would require use of search classified in Class 709, subclasses 203-204 and 227 (which would not required for the Group II);
- b) the Group II search (claims 11-15) would require use of search Class 375, subclasses 244 and 324 as well as Class 379, subclass 88.17, (which would not be required for the Group I, therefore restriction for examination purposes as indicated is proper.

5 Applicant is advised that the response to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed.
